MISSOURI'S REFRESHING & SPRING-FED FLOAT STREAMS

Hello and welcome to the Missouri Canoe and Floaters Association 2019 Directory. Whether you are a resident or visitor to Missouri I want to say thank you from the MCFA in choosing our Official Statewide Directory. Life can be busy and the beautiful streams and rivers of the Ozarks are a great place to stop, relax and just breathe!

Although the 2018 season was hot and dry, it didn't stop people from coming from all over the country to enjoy the cool waters and beauty of the Missouri Ozarks. I too was able to enjoy several different Missouri Rivers with my children this past summer. Sometimes the best memories are made outside!

I believe the waterways and outfitters served their purpose once again this past summer. Our goal at MCFA is to show people the beauty of nature that surrounds us and bring family and friends closer together through outdoor recreation, even with the busyness of life.

A visit to our website at missouricanoe.org and our Facebook page at facebook.com/MissouriCanoe will provide even more information to secure the best floating experience for you, your family and friends.

I hope you find our directory helpful and will continue to use it as your guide in finding the best time, the perfect outfitter and a great river to float this year and for years to come!

Sincerely,

Colin Cottrell, President
Missouri Canoe & Floaters Association

MCFA members and the rivers they float.
Includes website addresses.

**PURE WATER, PURE AIR
PURE FUN!
BE A KID AGAIN...**

AROUND EACH BEND A NEW WORLD UNFOLDS!

The water, the sounds and the sights are all unique to our beautiful rivers and streams. Look down into the clear, cold water and you'll see colorful rocks, worn smooth from the flowing water. Look up and tall bluffs tower majestically overhead. Eagles live up there and, if you are lucky, you might see one. Look downriver and there's the next bend. Who knows what treasures are on the other side? You have to be there, floating the river, to find out!

If you like to fish for trout or bass (who doesn't?) then toss your favorite rod into the boat and float your bait or lure into the gentle currents. Our streams are not heavily fished and luck is usually with the fisherman.

After a day on the water, streamside camping, cozy cabins and modern RV facilities will make your stay complete. Gather 'round an evening campfire and tell tall tales. A good night's sleep is almost guaranteed.

The only thing better than floating down a Missouri river? The family and friends you share the experience with!

SAFETY REGULATIONS

- **Do not jump into the river from bluffs or fallen trees.**
- **Do not swing on vines.**
- **Do not drink the water unless you boil or treat it first.**
- **Pack out what you bring in.**
- **Stay out of caves until you check with a ranger. If you go in, take 3 light sources.**
- **Always wear a life jacket on the river.**
- **Move your campsite if flood conditions begin to develop. Never go back to the river during high water – head for higher ground on foot.**
- **Do not take glass on Missouri streams. This is prohibited by Missouri law.**

HOW TO HANDLE CANOE EMERGENCIES

AVOID ROOTS!

The rootwads and trunks of trees present disastrous traps for the unwary.

STAY ALERT!

SWAMPING

If you get stuck on a rock or log, lean downstream. If you capsize be sure to stay upstream of the canoe. Otherwise you might get pinned between the boat and an obstruction.

TWO BASIC CANOEING STROKES

BASIC STROKES

The first stroke to learn is the simple bow stroke. The paddler reaches forward with the blade, dips it into the water and pulls it back along the side of the canoe. Although this is known as

the bow stroke, it is the basic stroke used by both the bow and stern paddlers when two persons are paddling.

The stern paddler, who is responsible for steering the canoe, ends the bow stroke with an outward sweep of the paddle.

For balance, safety and keeping on course, the stern paddler usually paddles on the opposite side of the canoe from the bow paddler. Strokes should be timed with those of the bow paddler. The bow paddler must learn additional strokes, for it is sometimes necessary to control the direction of the canoe from the bow.
