MISSOURI'S SPRING-FED FLOAT STREAMS

Hello and welcome to the Missouri Canoe and Floaters Association 2020 Directory. The MCFA thanks you for choosing our Official Statewide Directory. Whether you're a resident or visitor to Missouri, I believe our Directory is a great place to start searching for all your outdoor needs this year! The waterways in Missouri are incomparable and offer top-notch vacations for families and outdoor enthusiasts.

The weather throughout 2019 was unpredictable and kept everyone on their toes but the camping and floating season for most outfitters was nothing short of a success! Despite the weather, people from all over the country were not discouraged from enjoying the picturesque views, feelings of serenity and spending quality time with close family and friends out on the beautiful streams and rivers of the Ozarks.

As always, the waterways and outfitters here in Missouri did not disappoint! They once again have shown us how to reconnect with nature and enjoy time spent outdoors through various recreational activities with people we care about the most.

Don't forget to visit our website at missouricanoe.org and our Facebook page at facebook.com/MissouriCanoe which will provide plenty of information to secure the best floating experience for you, your family and friends.

The Missouri Canoe and Floaters Association is dedicated to the preservation of Missouri's natural waterways, providing up-to-date information on water levels and outfitters, paddle sports education and encouragement to get outside! I hope you find our Directory helpful this year and continue to count on us for all your outdoor recreation for years to come.

Sincerely,

Colin Cottrell, President
Missouri Canoe & Floaters Association

Includes website addresses.

CRYSTAL CLEAR, SPRING-FED RIVERS ADVENTURES IN MISSOURI! GREAT FOR FAMILIES

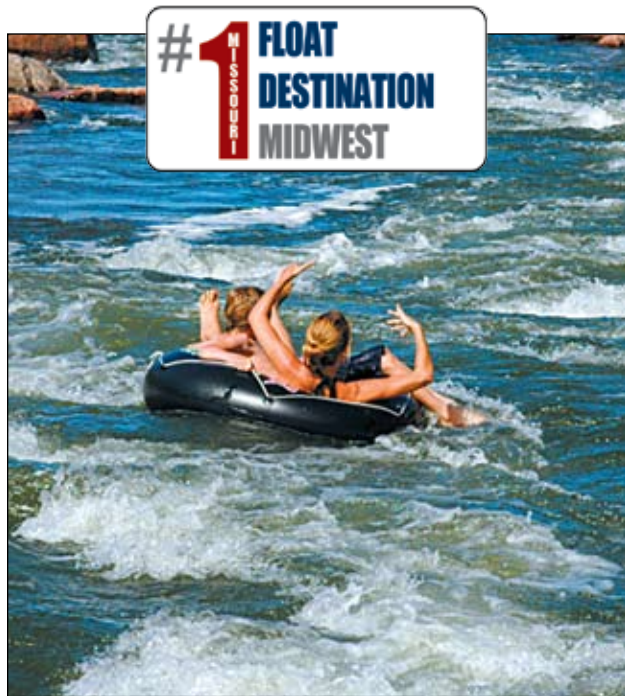

MISSOURI RIVERS AND STREAMS offer great floating, fishing and swimming. Canoeing, rafting, tubing and kayaking are among the most popular outdoor activities in Missouri. Enjoy beautiful scenery – towering limestone bluffs or a graceful great blue heron as you ride the river’s twists and bends

Outfitters on our rivers and streams are ready to launch floaters on a day, or longer, of fun and relaxation. Rushing springs, including some of America’s most majestic, keep streams floatable year-round. Many Ozark streams are known as some of the best floating and trout fishing streams in the Midwest.

And there’s not much paddling involved. For the most part, just go with the flow and admire the wonders of Missouri’s Ozark valleys. Along with canoes and equipment, outfitters may also offer campgrounds, RV sites, cabins and lodges.

A float trip on an Ozark waterway is an ideal vacation for the entire family. Our streams are cool, clear and spring-fed, providing some of the most enjoyable recreation in the state.

So pack up the car, bring the kids and meet us on the river for the experience of a lifetime!

SAFETY REGULATIONS

- **Do not jump into the river from bluffs or fallen trees.**
- **Do not swing on vines.**
- **Do not drink the water unless you boil or treat it first.**
- **Pack out what you bring in.**
- **Stay out of caves until you check with a ranger. If you go in, take 3 light sources.**
- **Always wear a life jacket on the river.**
- **Move your campsite if flood conditions begin to develop. Never go back to the river during high water – head for higher ground on foot.**
- **Do not take glass on Missouri streams. This is prohibited by Missouri law.**

HOW TO HANDLE CANOE EMERGENCIES

AVOID ROOTS!

The rootwads and trunks of trees present disastrous traps for the unwary.

STAY ALERT!

SWAMPING

If you get stuck on a rock or log, lean downstream. If you capsize be sure to stay upstream of the canoe. Otherwise you might get pinned between the boat and an obstruction.

TWO BASIC CANOEING STROKES

BASIC STROKES

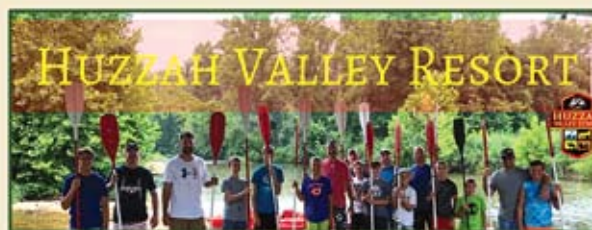

The first stroke to learn is the simple bow stroke. The paddler reaches forward with the blade, dips it into the water and pulls it back along the side of the canoe. Although this is known as

the bow stroke, it is the basic stroke used by both the bow and stern paddlers when two persons are paddling.

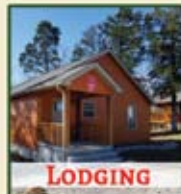

The stern paddler, who is responsible for steering the canoe, ends the bow stroke with an outward sweep of the paddle.

For balance, safety and keeping on course, the stern paddler usually paddles on the opposite side of the canoe from the bow paddler. Strokes should be timed with those of the bow paddler. The bow paddler must learn additional strokes, for it is sometimes necessary to control the direction of the canoe from the bow.
